Proposal Name: To reveal what is hidden in the DAO management system

Proposal Category: Process

ABSTRACT

We need to make The Special Council actions more transparent and controlled by the DAO since their hidden activity harms the organisation.

MOTIVATION

There are a lot of things happenes behind the scene by the very small group of players who should serve the DAO, not to control and use it. Overcontrol and bureaucracy by these group almost killed proposal creation, discussion and voting activity.

For example at the moment we have 88,000 holders. And one of the most recent proposals collected only 612 votes, and just three out of all voters In favour of the proposal represented around 1/3 of all voting power. This makes our DAO a joke.

RATIONALE

Without decentralisation the DAO can't function properly. This proposal is the first step to reveal the problems and save the DAO from centralisation which serves in favour of small groups of insiders and lobbyists making the DAO weak.

STEPS TO IMPLEMENT

The Special Council should discuss proposals only openly and using https://forum.apecoin.com/

This should be clearly communicated how and when The Special Council members are getting compensated, if so

Total time allocated to Administrative Reviews of proposals by the Special Council should be limited by 14 days

If The Special Council or administrators reject for some reason a proposal, they should work on and offer to an author an alternative version of a proposal that The Special Council will be able to accept

Every question to authors of proposals from administration or The Special Council should be accompanied by an explanation and motivation of why a question was asked

TIMELINE

Start immediately after voting is over.

OVERALL COST

There is no expenses to be spent.
