Hi everyone, this is my (Tempe Techie) delegate communication thread.

Basic info:

- Name: Tempe Techie

- ENS: TempeTechie.eth

- Delegate address: 0xb29050965A5AC70ab487aa47546cdCBc97dAE45D

- Farcaster: @tempetechie.eth

- Tally profile: TempeTechie.eth's Delegate Profile

- Telegram: Contact @tempetechie

- Karma: https://arbitrum.karmahq.xyz/profile/tempetechie.eth

About me:

I am a software developer with over 10 years of professional experience. In the past 4 years I have been full-time in web3 development, using mainly Solidity (for smart contracts) and JavaScript/Vue on the frontend.

My focus is mainly on non-financial usecases of crypto, especially Web3 Social (e.g. social networks, chats etc.). I think tools which enable decentralized communication and governance are of major importance.

Some of the tools I've built include the Arbitrum Delegate Frame on Farcaster, which allows Farcaster users to check who their delegate is, and set a new delegate if needed. Another tool is called Iggy and it's a Web3 Social framework, sort of like "wordpress" for web3 social.

I am an active voter in the Arbitrum DAO. I support proposals which are geared towards decentralization, censorship-resistance, and better communication & governance.

I often attend Ethereum conferences (Devcon, DevConnect, ETH Prague etc.) so you can meet me there and discuss everything related Arbitrum and Web3 Social.
