Installing SFA iOS SDK

Swift Package Manager[â](#)

Add the SFA iOS SDK to your project[â](#)

1. In Xcode, with your app project open, navigate toFile > Add Packages
2. .
3. When prompted, add the tKey iOS SDK repository:
4. https://github.com/Web3Auth/single-factor-auth-swift
5. From theDependency Rule
6. dropdown, selectExact Version
7. and enter2.0.3
8. as the version.
9. When finished, Xcode will automatically begin resolving and downloading your dependencies in the background.

Cocoapods[â](#)

pod 'SingleFactorAuth', '~> 2.0.3' [Edit this page](#) [Previous Overview](#) [Next Initialize](#)
