Hello, dYdX community, this is nysa.network.

We are thrilled to become a part of the dYdX community and aim to contribute to the best of our capabilities.

Entity name and location

We are nysa.network, headquartered in the Singapore.

Infrastructure location

Our physical infrastructure is primarily located France (not OVH).

What kind of hardware do you use? Baremetal, cloud-based…? In what geographic regions?

We utilize high-end bare metal servers in located France.

Technical composition of the team (provide details on the number of DevOps engineers, experience, etc.)

- We have a Lead Infrastructure / DevOps with over a decade of experience, previously working for a large cloud/baremetal provider.

- Swiss Knife developer / devops.

- (soon) Business Developer with 6+ years in crypto

Years of experience

Members are involved in the crypto space for almost 10 years, We have been in the validation business since 2021.

What other networks do you run validators for?

Currently, we operate validators in numerous PoS blockchains,

- Injective

- Juno

- Checqd

- Nois

- Stargaze

- Orai

- Ki

- Composable

- OKP4

- Teritori

Overall, our delegators and nominators have entrusted us with between 1 - 4 millions in crypto assets. You can find more information about us on our website https://nysa.network

Do you have a validator voting framework and process?

We actively participate in on-chain governance and engage with the community on Discord.

We developed and open-source cosmos-tower, a Discord bot using Authz to vote from your discord server.

Are you planning to take on any additional roles in the dYdX ecosystem (e.g., market maker, trader, indexer, front-end, other)?

We will support dYdX with our infrastructure services such as prunned snapshots and state-sync, public-rpc.

We also developed some side tools, public monitoring tools, etc…

Are there any other products or services you would like to emphasize that could be relevant for dYdX?

nysa.network not only serves as a trusted validator for proof-of-stake blockchains but also offers major infrastructure services for various projects.

- 2x daily prunned snapshots

- Public RPCs

- State-sync

- addrbook.json

- public gRPC (with and without TLS)

- cosmos-tower

- cosmos-exporter

- teritori rarity bot

Any notable contributions in other ecosystems that you would like to highlight for the community?

Feel free to enjoy our public RPCs / gRPC
