Key Variables

danger Please make sure you are using the right variables depending on your Lava network.

Chain ID

ThechainId is a unique identifier for a blockchain network. It distinguishes between different networks, ensuring that transactions and data are correctly associated with the intended chain. Using the correctchainId is crucial for maintaining the integrity and functionality of your operations on the Lava network.

- For Lava Testnet:
- lava-testnet-2
- For Lava Mainnet:
- lava-mainnet-1
