Create a new Wallet

```
Copy usingSecretNET; usingSecretNET.Common; usingSecretNET.Common.Storage; usingSystem;

// Select a storage provider for the wallet // Docs: https://github.com/0xxCodemonkey/SecretNET#creating--initializing-the-wallet varstorageProvider=newAesEncryptedFileStorage("","SuperSecurePassword"); varcreateWalletOptions=newCreateWalletOptions(storageProvider);

// Create a new account varwallet=awaitWallet.Create(options:createWalletOptions);

// get infos from https://docs.scrt.network/secret-network-documentation/development/connecting-to-the-network vargprcUrl="https://grpc.testnet.secretsaturn.net"; varchainId="pulsar-3";

// Create a readonly connection to Secret Network node (does not attach the wallet) varsecretClient=newSecretNetworkClient(gprcUrl,chainId,wallet:null);// without a wallet

varresponse=awaitsecretClient.Query.Bank.Balance(wallet.Address);

Console.WriteLine("Mnemonic: "+(awaitstorageProvider.GetMnemonic(wallet.Address))); Console.WriteLine("Address: "+wallet.Address); Console.WriteLine("Balance: {(float.Parse(response.Amount)/1000000f)} SCRT");// 1,000,00 uscrt = 1 SCRT

```
