Sushi Relay

Mainnet is Dec 9th, the time frame for the launch on frontend is from 1:00am to 4:00 am EST. We have setup a communications channel for both teams on telegram and slack and will also provide availability during the regularly scheduled Sushi Community Call later that day.

Staking

Staking will launch regardless on Dec 10th. If Sushi Relay has not launched by Dec 10th, a 50,000 USD (paid in FOLD) will be disbursed by the treasury (i.e. we will pay a fine of 50,000 USD everyday that the launch has not happened after Dec 10th, 2021.

We have discovered a small bug in the staking contract that technically allows ETH as well as FOLD to be accepted in deposits. We are ensuring that this does not cause any issues and will redeploy a fix if necessary. It should be noted that this does not have any security issues per se.
