Pimlico Paymasters

Pimlico providers two different types of paymasters to allow you to abstract away the gas fees for your users.

Verifying Paymaster

Our Verifying Paymaster allows you to load up your off-chain Pimlico balance through [our dashboard](#) and sponsor the on-chain gas fees for your users on over 30+ chains.

ERC-20 Paymaster

Our ERC-20 Paymaster is a permissionless on-chain smart contract that lets your users pay for their own gas fees using their ERC-20 tokens.
