WhisperNode has formally submitted a proposal to modify the BlocksPerYear parameter to better align expected inflation and actual inflation. The actual inflation is currently 12.605% versus the 15% max inflation set by the protocol due to a discrepancy in the actual rate of block production.

The full details of the proposal can be found [HERE](#).

This proposal is currently in the Deposit Period and WhisperNode requests that anyone in favor please help get this into the voting period by depositing SCRT.
