SecretPath CCL SDK

A complete, compact, and simple encryption + RNG toolkit for EVM chains, written in TypeScript.[SecretPath](#) is a trustless bridge that allows EVM developers to use the privacy-preserving power of Secret smart contracts.

Secret Network Foundation developed a[NPM package](#) ,secret-network-ccl, to simplify the developer experience, allowingEVM encryption, verifiable randomness, and arbitrary execution/querying of Secret contracts on[connected EVM chains](#) .
