More than a week ago, I submitted a grant application, and status of it didn't change

Some other application which was submitted later is approved, but mine is not even "in-review"

Maybe somebody can suggest? Does it mean it's not even considered?

Or is there anything else I can do

Just in case here is the link and in any case I would be happy to know the community opinion

Lex Secretum - the educational development program with the focus on Secret Smart Contracts

Project Description

Lex Secretum - the educational development program wi...

th the focus on Secret Smart Contracts

Problem / Solution

Our days are considered to be still early days in crypto.

The adoption could be bigger, more dapps could be created and the focus on privacy could be much bigger.

For entrepreneurs and developers there are many opportunities regarding which blockchain to build on and where to get funding.

Secret Network as a relatively new cryptocurrency and ecosystem is still not so known compared with other blockchains.

Our solution and proposal is to create an educational development program about Secret Network, share and promote it in the development and crypto communities.

Detailed Project Description

In this proposal we would like to combine development, educational, awareness and marketing components. We propose to create 5 educational episodes on the following topics. 1. The Introduction to Secret Network (History, Philosophy, Tokenomics) and Secret Contracts 2. How to create a Secret App 3. SNIP-20 tokens 4. Secret DEXes 5. Secret NFTs

Each episode will be uploaded to Cryptotexty youtube channel (1K+ subscribers https://www.youtube.com/c/CryptoTexty1/), published on https://cryptotexty.io/ and shared on 20+ crypto blogs and social media sites.

Then, the detailed text version will be composed and the publication will be shared again on those sites. Combined each episode will get thousands of views and will reach the developers, crypto-entrepreneurs, crypto-enthusiasts and others.

The time of delivery: 1-2 months

Links to some of the crypto-blogs: Hive / LeoFinance - 1676 subscribers https://hive.blog/@flodner Publish0x - 749 followers https://www.publish0x.com/@Flodner Twitter - 10K+ followers https://twitter.com/flodner Loop.markets (Platform with focus on Terra, related ecosystem) - serious rank with 350K tokens https://www.loop.markets/user/20994 Read.cash - 150+ subscribers https://read.cash/@cryptotexty Etc.

In addition to the educational purpose, each episode will have 40+ publications (20 after the video release, and then 20 after the text version is completed), so overall it will be 200+ publications. Of course, we assume that they will be republished all by others so we hope the number will be much higher.

We hope this incentive will help small teams such as ours to dive in more deeply into the Secret Network ecosystem, remain active and come up with new development ideas.

Team

Andrii - researcher, founder of Cryptotexty, in crypto since 2017, over 15 years of experience in online marketing, Secret Agent

mofa28 - cybersecurity expert, founder of Telegram channel https://t.me/cryptooffensive, in crypto since 2012

Alyona - crypto-enthusiast, translator, editor

Budget

We would like to ask for 1515 SCRT (which at the moment of writing is $9722) This would be 303 SCRT for the episode
