Great news everyone!

Arbitrum DAO has received the premium package at Ethereum Bucharest

(https://ethbucharest.xyz/)(27-30 March) as a thanks for matching their round on Arbitrum and my personal efforts in supporting them + have Arbitrum presence at the event. Kudos to PL(again…) for enabling a plurality of outcomes

This means we have:

We have 2000$ in bounties to offer to builders that will participate in the hackathon

10 tickets to give out to those that want to attend. Please comment here if you need one!

An Arbitrum(or Arb DAO, TBD) booth present in which you'll probably find me and who ever wants to come

Overall Arbitrum will have a solid presence at the event in terms of branding, digital ads and so on

There is an open question here tho-this was achieved done via the DAO so should we say is for Arbitrum or Arbitrum DAO? Not saying we should, but idk if we can say it's Arbitrum since the foundation is not involved in this.

Would really appreciated some feedback from some of the more experienced DAOnaughts
