Vyper Example Box¶

This box contains a simpleVyperStorage contract to show the basics of using Vyper with Truffle.

Installation¶

1. Install Truffle globally. Make sure you have v5.0.0 or higher.
2. npm install -g truffle
3. Download the box. This also takes care of installing the necessary dependencies.
4. truffle unbox vyper-example
5. Run the development console.
6. truffle develop
7. Compile and migrate the smart contracts. Note inside the development console we don't preface commands withtruffle
8. .
9. compile
10. migrate
11. Run the tests.
12. // If inside the development console.
13. test
14. // If outside the development console..
15. truffle test
