# Simple Arbitrage Bot

simple-arbitrage is a repository that contains a simple, mechanical system for discovering, evaluating, rating, and submitting arbitrage opportunities to the Flashbots bundle endpoint. Please note that this isvery unlikely to be profitable, as many users have access to it, and it is targeting well-known Ethereum opportunities.

We hope you will use the simple repository as an example of how to integrate Flashbots into your own Flashbot searcher (bot). Access the simple-arbitrage repository[here](#) . [Edit this page](#) Last updatedonJan 30, 2024[Previous Quick Start](#) [Next Searcher Sponsored TX](#)
