Hello everyone! I am very excited to watch how the future of Web3.0 and this organization grows with it along the way. I was just curious if there would be a potentially set topic or section that would involve resources to learn about everything as the DAO and Web3.0 evolve. I am no expert on things from Web3.0, NFTs, or cryptocurrency, but am incredibly intrigued and want to learn as much about them as I can to better educate myself. Nevertheless I can't wait to see how all of this grows and develops!
