Solana Commitment Status

The[commitment](#) metric gives clients a standard measure of the network confirmation for the block. Clients can then use this information to derive their own measures of commitment.

There are three specific commitment statuses:

- Processed
- Confirmed
- Finalized

Property Processed Confirmed Finalized Received block X X X Block on majority fork X X X Block contains target tx X X X 66%+ stake voted on block - X X 31+ confirmed blocks built atop block - - X [Previous Cluster Performance Metrics](#) [Next Fork Generation](#)
