I attempt to enter in amounts and when I hit enter the amount goes back to zero.

I tried reversing the ordering of tokens with the same result. I can provide liquidity for this pair. Just can't swap.

I recall having a similar situation when I was beta testing secretswp back in February.

I would like to get the sSCRT-sXMR pair working in secretswap on holodeck before I write a blog post on the Secret Monero Bridge v0.0.1 release.
