ACAC

Yes, all of them are unique in their own way some with more rare features then others and will be able to be worn on your characters within metaverses and games! Below are the concepts we have for it so far but yes they will also have 3D molds that can be linked and worn in those metaverse and hopefully many games in the future to come!

"It's Dangerous to go in alone! Take this."

ACPC

Yes, all of them are unique in their own way some with more rare features then others and will be able to follow your character within the metaverse and games!

Motivation | A statement on why the APE Community should implement the proposal. Rationale | An explanation of how the proposal aligns with the APE Community's mission and guiding values.

Not only will this bring more massive utility to all NFTs by making them the first multi-metaverse linked wearable NFTs making them playable and useable across all three of the top metaverses, and also the raw file so they can use on their own personal projects and ventures. This will also set the correct course example on the destiny of what NFTs could have meant to go towards all along. Almost all of us know by now that one of the founders of Ethereum got motivated by the creation of it based on his negative experience in the unapproved modification of a World of Warcraft in game item can be seen here: NFT mastermind created Ethereum because Warcraft nerfed his character - Polygon 6

Specifications | A detailed breakdown of the platforms and technologies that will be used.

Aside from my team and I creating all the full body 3D molds and rigs for each of the NFTs I will be personally working through the logistics and campaigning to get all VP votes needed in the Decentraland DAO and the Sandbox team to join us in this pioneering venture to complete our mission.

As can see already I have experience in this space by getting my teams Waifumon Gen-2 linked into Decentraland the first metaverse with almost 100 votes and over 7 Million VP to pass from the Decentraland Community.

Decentraland DAO

Add (pt1) (attp2) Waifumon linked Gen-2 (no funding required 4 this part) to...

Should (pt1) (attp2) Waifumon linked Gen-2 (no funding required 4 this part) be added to the Linked Wearables Registry?

With our teams, previous experience with our Disney Quality 3D Princess Feature film we have learned a lot. Not only about all the different creation process's and programs like blender and Unreal engine we have also took on and achieved the advance hair and fur movement features that most 3D models do not have because they are very advance and time consuming to create. We also innovated the space by utilizing techniques Disney has not even used before in any of their 3D Princess movies such as tears, dirt and mud reacting and rubbing off on the skin when they get up. All this can be viewed in our latest teaser trailer video here:

**Steps to Implement | The steps to implement the proposal, including associated costs, manpower, and other resources for each step where applicable. **

-Step 1 Several 2D demos to show the ApeCoin DAO for ACAC and ACPC (community can pitch too as artists as well to join the team)

-Step 2 Start Generation of the 20,000 ACAC and ACPC 2D

-Step 3 Several 3D demos to show the ApeCoin DAO for ACAC and ACPC

-Step 4 Linking 3D ACAC and ACPC into Decentraland

-Step 5 Get the NFTs to everyone and begin logistics on how to start also linking in Sandbox and Otherside if the community wants as well.

**Overall Cost | The total cost to implement the proposal. **

$4.20 in $APECOIN per unique 3D Mold

to make for all: (for now just Decentraland and raw file download to use for personal use) If OtherSide will allow these same files to be linked in OtherSide as well then will be no additional charge! (future goals also linked in Sandbox)(however Animoca Brands may be doing those 3D molds instead of us at that point in time for sandbox that is for future proposal) Also if requested for higher quality files for OtherSide or other projects can also be requested in future proposals if needed.

-20,000 ACPC (1st editions) multi-linked metaverse NFTs

-20,000 ACAC (1st editions) multi-linked metaverse NFTs

- 1 (not unique will have ApeCoin logo on shield) ACAC to all the first ApeCoin Holders 200,000

- 1 (not unique will have ApeCoin logo on belly) ACPC to all ApeCoin Holders 200,000

- 1 (not unique will have etherscan ApeCoin logo on shield) ACAC to all ApeCoin WG0 holders 507

@AaronLeupp

If you know where this from. You a real one.https://t.co/G2a8ohcd54

2:39 AM - 13 Jan 2023 15

3

Total $168,000

All 2D creation. All 3D creations, all 2D and 3D demo creations, both 2D and 3D generating, snapshots, linking logistics, Data Scrapping, all included in the price above.

Payment Vesting Step 1 through 5. = 20% of total payment each.

**I am still looking for a reason to say no to this but can't find any reason why. Can I just say it's because I just don't like, and hate your face? **

](https://www.youtube.com/watch?v=M3lGKMXYOG8)

"Ok, ok all I can do is take that in, conceder it and I will just try to do my best version of whatever I think that will be."

End of Pitch

It has been 9 months since I pitched AIP-61. This new proposal is consitant pivots, changes, updates from everyones feedback and ideas. As you can see we are patient and willing to continue to pivot as much as needed so def let us know. We are open to all debates, criticism, feedback, counters and thoughts since we would love to be a part of such a pioneering

venture as this, and also would really love to continue to prove ourselves. We also really hope this idea comes to life regardless if choosing us to execute it or not since sounds like a ton of fun. So, if so or not, regardless thanks again for this opportunity in pitching this API idea to this DAO!

More Relevant 3D work from us can see all on our site and can share anymore too!
