Web3Auth PnP Android SDK

The Web3AuthAndroid SDK is a client-side library you can use with your Android app to authenticate users using Web3Auth. For using Web3Auth natively in Android, Web3Auth provides an Android SDK written inKotlin . It returns a private key generated in a non-custodial way on successful user authentication. This authentication can be achieved by using any social login options that Web3Auth supports or custom authentication flow of your choice.

This Documentation is based on the6.1.0

SDK Version.â

Requirementsâ

- Android API version24
- or newer.
- Android Compile and Target SDK:34
- .
- Basic knowledge of Java or Kotlin Development.
