Hi guys, this is my first post,

I just found out a series of foreign transactions on my ether scan,

both on Matic net and Etherium Mainnet

Last night about 6 hours ago, I approved Uniswap on several token permissions and AAVE cookies. Also a JAVA UPDATE. That was it.

Tonight, I came to check on my Metamask and everything was gone, came to check on my AAVE/Curve account and it was also all gone. If anyone has been through similar situations please HELP!! I lost what I cannot afford to lose, if anyone can help retrieve the lost fund (around 16,000USD) I'm willing to give 30% of it as a reward.

Any suggestion on what I should do from now on is very much appreciated!

- My metamask address: 0x5bc6f4ba5de879ab1f11c5c03b7723fd31fb44f8

- Etherscan:

- The hacker's address: 0xe2fe66c7e452c3175a25b6b30bf0f45a6228e33a

- Debank: DeBank | DeFi Wallet for Ethereum Users

He took everything in the wallet and logged in to my AAVE and Curve account

Any help is help. please help!!!
