Hi,

thanks for sharing again (also said that in the chat).

The results are like that:

[0.04468379562495979]

[0.04468379562495979, 0.04466911064704264]

[0.04468379562495979, 0.04466911064704264, 0.044610228323998906]

How can I read it?

Since it is nested for loop, does that mean that the first line is lr=0.006 + cs = 0.06 + md = 4 and then the third line is: lr=0.006 + cs = 0.06 + md = 6

Any help, super appreciated!
