Remove Election Phases/Stages/Rounds:

TEAM DESCRIPTION:

[@furiousanger](#) - DAO member.

PROPOSAL DESCRIPTION:

Election phases/stages/rounds (whatever the title given) will be discontinued and the process streamlined.

Elections will start and finish inside the current voting period without any phases/stages/rounds.

BENEFIT TO APECOIN ECOSYSTEM:

Phases/stages/rounds (terms used) are unnecessary. They interfere with entrants' momentum; boost and deflate people's drive once results are declared; makes the following "part" highly predictable and unattractive to the community.

By looking at past elections a clear pattern emerges - whoever was at the top stays at the top and wins.

Phases/stages/rounds potentially undermine any benefits that could be realised by a shielded voting strategy.

DEFINITIONS:

Phases/stages/rounds - how parts of the election cycle are described in AIPs. All mean the same - elections are split up.

STEPS TO IMPLEMENT:

Elections will be run with the same schedule as an AIP vote.

Make elections reflect the current voting period with no more phases/stages/rounds.

OVERALL COST:

ZERO COST.
