I am creating a set videos about the protocol to help people better understand what we are building and make this information accessible to folks that prefer watching video to reading giant blocks of text.

You can find the first one about Transaction Execution here:

[

](https://www.youtube.com/watch?v=RaIBeuw9L6w)

This video primarily covers the content in the[Transactions section](#) of the protocol specification in the docs.

Feel free to drop questions below.
