Indexer API

A convenient API for retrieving open positions, transaction history, price history, pool statistics, and other on-chain information in convenient form is both available for easy and convenient self-hosting, as well as being centrally hosted by the Ambient project.

More information about the available endpoints can be found in thegraphcache-go project repo here:https://github.com/CrocSwap/graphcache-go A centrally hosted version of the API is available from:

Mainnet:https://ambindexer.net/gcgo/

Scroll:https://ambindexer.net/scroll-gcgo

Running the indexer is light weight and can be done on most desktop machines. More instructions for running the indexer locally are in the linked Github repo.
