Database Storage Requirements

The configuration variabledb_storage can be used to define the amount of storage allocated to your RDS instance. The chart below shows an estimated amount of storage that is required to index individual chains. Note these numbers are estimates and are constantly increasing.

Thedb_storage can only be adjusted 1 time in a 24 hour period on AWS.

Chain Storage (GiB) POA Core 790 POA Sokol 320 Ethereum Classic 250 Ethereum Mainnet 11000 Kovan Testnet 250 Ropsten Testnet 6000 Gnosis Chain 1900 Gnosis Chain Testnet 10
