Lido DAO, the proposal to add Chorus One as a node operator is live and can be found here:https://mainnet.lido.fi/#/lido-dao/0x2e59a20f205bb85a89c53f1936454680651e618e/

Should this pass, there will be a second vote within the next 48h to suggest a limit number of validator keys to validate with.

- Organization name:

Chorus One

- Organization website:

http://chorus.one

- Organization Github:

https://github.com/ChorusOne

- Organization social channels:

[Twitter](#), [Telegram](#)

- Organization location:

Switzerland

- Organization size:

10-100

- Brief description of organization:

Chorus One is a staking provider and building solutions to facilitate blockchain interoperability.

- Brief description of performance track record:

Starting as a genesis validator in the Cosmos ecosystem in 2018, we have to date helped launch and maintain over a dozen networks.

- Overview of supported networks:

E.g. Solana, NEAR, Chainlink, Celo, SKALE - full list https://chorus.one/networks

- Motivation for application:

Liquid staking is needed to combat Proof-of-Stake centralizing around large centralized custodial entities. Lido is the most advanced ETH2 staking protocol with decentralization at its core.

- Security set up for ETH staking:

Battletested Kubernetes-based multi-vendor and multi-region infrastructure.

- History of participating in ETH testnet:

We participated in the Pyrmont and earlier testnets and have been operating Ethereum infrastructure for over a year.
