Types

The types used by the Session Keys project.

```
Copy export type SessionKey = { publicKey: string privateKey: string }

export interface AllowedMethod { "Contract Address": string selector: string }

export type MetadataTxFee = { tokenAddress: string maxAmount: string }

export type SessionMetadata = { projectID: string txFees: MetadataTxFee[] projectSignature?: Signature }

export type BuildSessionAccountParams = { session: Session sessionKey: SessionKey provider: ProviderInterface useCacheAuthorisation?: boolean argentSessionServiceBaseUrl?: string }

export type CreateSessionParams = { sessionKey: SessionKey allowedMethods: AllowedMethod[] expiry: bigint metaData: SessionMetadata }
```
