If you agree to the exploring the idea more please click the button top left "vote yes". Also if you like it give it a heart. Finally comments most welcome.

I have been going through the ApeCoin Dao and come across various bugs and problems with the tools. Right now I have put up AIPs to fix them, but I think a bug finding program should be a formal program outside of the ThankApe tool which is more automated.

There should be an allocation of ApeCoin. It could be reviewed by the Stewards and/or Ape Assembly.

The rewards should be significant so people care to find these problems which will improve the overall quality and reputation of the ApeCoin Dao.

The reward bounties should be worthwhile and it is much cheaper than having people hired to do this. I think the rewards should be in the 500-2000 ApeCoin range if the bug is deemed important enough to fix by the community.

Some are straight out errors which need to be fixed asap:

[AIP-295: Protect Snapshot - Must have 1 Apecoin to vote](Accepted AIPs

](/c/final-aips/accepted-aips/23)

haha 3 digits it's a very good idea

Some are suggestions/improvements such as:

[Integration of ENS and Unstoppable domains on apestake.io website](Withdrawn AIPs

](/c/withdrawn/18)

Pretty bullish idea ngl!

I have added another bug in the comments below, which I am not putting up as a separate AIP for now.
