Adding Custom RPCs

Argent X provides you with the ability to add custom RPCs (Remote Procedure Calls). You could do this following these steps:

1. Open your Argent X extension, then navigate to Settings → Developer settings → Manage Networks
2. Click on the+
3. icon to add a new network.
4.

?

Fill in theNetwork name ,Chain ID andRPC URL .

For Sepolia, the following RPC URLs can be used:

Blast :https://starknet-sepolia.public.blastapi.io/

Nethermind :https://free-rpc.nethermind.io/sepolia-juno/v0_5

Infura :TBC

1. Next up, click on "Advanced settings", and fill in theAccount class hash
2. ,Fee token address
3. , andMulticall address
4. . You could optionally fill in the other fields.
5.

6. Account class hash - represents the class hash for the account implementation.

7. Fee token address - represents the address of the token with which fees are paid on the network.
8. Multicall address - address of multicall contract.
9.

?

1. Finally, click on Save and your new custom RPC will be added to your Argent X wallet. To add tokens such as Ethereum to your wallet, simply click on"New Token"
2. and fill in the required details.
3.
