Avail Transparency Report

Avail Transparency Reports (ATR) are simple summaries of upcoming or executed changes made to the Avail Network.

ATRs include:

- The proposed changes
- Code (where necessary)
- Potential merits to the network
- Resources (If any)

ATRs will be posted on the Avail Community Forum(opens in a new tab) under the ATR sub-category in the Governance section.

Given the sensitivity of emergency changes, ATRs will be posted for community transparency on the forum after the changes have been made.
