Gm everyone, Mikey from Cosmostation here.

Cosmostation is a globally trusted enterprise-level crypto infrastructure company operating validator nodes and building user interfaces for 60+ networks & 500k+ users with a strong emphasis on Cosmos Interchain ecosystem since 2018. On top of its secure node operation, Cosmostation offers a comprehensive suite of end-user products including Mintscan block explorer, Cosmostation browser extension wallet and Cosmostation mobile (iOS & Android) wallet in order to support the communities and contribute to the ecosystem.

dYdX has been a leading & constantly-innovating DeFi frontier within the Ethereum ecosystem providing users an intuitive, powerful trading platform. As one of the most enthusiastic builders/contributors in the Cosmos ecosystem, Cosmostation believes that the launch of dYdX appchain will bring significant benefits to all. We are very excited for the upcoming launch and looking forward to supporting & contributing to the dYdX community with our products suite.

Here are some brief introductions of our end-user products:

Mintscan is the go-to block explorer for Cosmos Interchain ecosystem. ([Interchain Explorer by Cosmostation](#)) Mintscan displays various types of useful data of ~60 blockchain networks including smart contracts, IBC relayers, validators, assets and much more, in a user-friendly UI/UX.

Mintscan Hub is the Cosmos Interchain data analytics platform. Mintscan Hub aggregates & visualizes data to provide users, developers and exchanges a series of useful statistics and analytics to help them navigate through the ecosystem.

Cosmostation Browser Extension non-custodial wallet ([Cosmostation Wallet - Chrome Web Store](#)) natively supports ~60 Cosmos Interchain networks, 13 major EVM networks and Move-based blockchains including Sui and Aptos - users can manage their fragmented assets across multiple ecosystems within one single wallet interface.

Cosmostation Mobile non-custodial wallet(iOS & Android) supports all the fundamental features of on-chain activities such as send, IBC send, stake, vote and more. Also, with the integration of various dApps on "DAPP" section, users of Cosmostation Mobile are able to interact with on-chain applications anywhere they go, anytime they want.

Looking forward to supporting dYdX community in a variety of aspects & taking parts as a long-term contributor to the ecosystem!
