As you know, the Aragon UI has not been updated for a year, a lot has changed during this time: easy track has been released, a separate interface for viewing and upload keys has been made for node operators https://operators.lido.fi/

So, our https://mainnet.lido.fi/ interface is outdated, and we need to update it:

- Removed DEPOSIT BUFFERED ETHER

button from Lido App (due to front-running vulnerability, see LIP-5)

- Removed Add signin keys

from NOS App

Important!

We only change the frontend and do not touch smart contracts.

Previous IPFS hashes:

Lido app - QmbmPW5r9HMdyUARNJjjE7MNqBUGrXashwoWvqRZhc1t5b

NOS app - QmQExJkoyg7xWXJjLaYC75UAmsGY1STY41YTG3wEK7q8dd

New IPFS hashes:

Lido app - QmQkJMtvu4tyJvWrPXJfjLfyTWn959iayyNjp7YqNzX7pS

NOS app - Qma7PXHmEj4js2gjM9vtHPtqvuK82iS5EYPiJmzKLzU58G
