# CSS Configuration & Presets

- CSS:
- Update the import instruction inapps/block_scout_web/assets/css/theme/_variables.scss
- to select a preset css file. This is reflected in theproduction-{chain}
- branch for each instance. For example, in theproduction-xdai
- branch, comment out@import "neutral_variables
- and uncomment@import "dai-variables"
- .
- ENV:
- Update theenvironment variables
- to match the chain specs.

Current css presets

```

Copy @import "theme/base_variables"; @import "neutral_variables"; // @import "dai_variables"; // @import "ethereum_classic_variables"; // @import "ethereum_variables"; // @import "ether1_variables"; // @import "expanse_variables"; // @import "gochain_variables"; // @import "goerli_variables"; // @import "kovan_variables"; // @import "lukso_variables"; // @import "musicoin_variables"; // @import "pirl_variables"; // @import "poa_variables"; // @import "posdao_variables"; // @import "rinkeby_variables"; // @import "ropsten_variables"; // @import "social_variables"; // @import "sokol_variables"; // @import "tobalaba_variables"; // @import "tomochain_variables"; // @import "rsk_variables";

```
