Hello! We need some brave volunteers to troubleshoot our networked testnet. This is a high priority for us, so please make a note here if you're willing to spend some time in the next 4-5 days! cc [@anon60841010](#) [@Brendan](#) [@can](#) [@victor](#)

- very helpful if you have SGX hardware

- if you don't but are interested in helping, still let me know.

Respond in thread and I'll follow up!
