Rate Limits & API Key

Learn about our rate limits and how to obtain and configure an API key. Our API is free to integrate but rate-limited.

Ifnot authenticated per API key, the default rate limits will be applied:

- 200 requests in 2 hours to /quote or /routes
- 20 rpm (request per minute) for all other requests combined
-

Ifauthenticated via API key, the rate limits are as follows:

- 200 * 120 requests in 2 hours to /quote
- 200 RPM for all other requests
-

If you're using the API directly, you can configure the API key as described here .

If you're using our SDK, you can configure the API key as described here .

If you're using the Widget, youshould not use an API key.

Apply for an API key here: https://help.li.fi/hc/en-us/requests/new If you encounter CORS issues after implementing the API key, please check this technical article.
