We have a few important upgrades coming to the Flashbots Bundle Relay API!

- new methods with PoS related fields: flashbots_getBundleStatsV2

and flashbots_getUserStatsV2

- bundle cancellations
- switch from HTTP to JSON-RPC standards for success and error responses

New Methods with POS related fields

:

1. flashbots_getBundleStatsV2

has two new fields: * consideredByBuildersAt

contains timestamps indicating when a builder considered the bundle for the target block

- sealedByBuildersAt

contains timestamps indicating when a builder built a full block containing the bundle

1. consideredByBuildersAt

contains timestamps indicating when a builder considered the bundle for the target block

1. sealedByBuildersAt

contains timestamps indicating when a builder built a full block containing the bundle

1. flashbots_getUserStatsV2

renames miner

fields to validator

flashbots_getBundleStats

and flashbots_getUserStats

will be deprecated on March 31, 2023, please use V2 methods!

Searcher clients will be updated to include V2 stats and cancellations

:

- ethers-provider-flashbots-bundle.js: [V2 Stats](#) and [Cancellations](#)
- web3-flashbots.py: [V2 Stats](#) and [Cancellations](#)

Documentation

:

- [V2 Stats](#)
- [Cancellations](#)
- [API Response](#)

All upgrades have been deployed to

:

- Goerli Testnet: https://relay-goerli.flashbots.net
- Sepolia Testnet: https://bundle-relay-sepolia.flashbots.net
- Mainnet Staging: https://relay-staging.flashbots.net

Upgrades will be deployed to Mainnet Production next week.
