JSON-RPC methods

The standard Ethereum methods documented here are supported by Infura on the Optimism network. For custom Optimism methods, please see [Optimism Ethereum JSON-RPC API documentation](#) (Bedrock release).

info The Optimism Bedrock migration supports different JSON-RPC methods. Refer to the [Optimism Bedrock documentation](#) for more information. You need to be aware of the [differences between the behavior of Ethereum and Optimism](#). For example, there are differences related to:

- Opcodes
- Transaction and transaction pools
- Block time and size
