SECTION 1: APPLICANT INFORMATION

Provide personal or organisational details, including the applicant's name, contact information, and the name of any associated organisation. This information ensures proper identification and communication throughout the grant process.

Applicant Name or Alias

: Serge

Project Name

: Perpetual Positions Dashboard

Project Description:

- Tool for quick and convenient monitoring of open positions and filtering them by the most profitable traders

Team Members and Qualifications:

Serge - Dev (PHP, JS)

Project Links:

https://imxflow.com/GMX/

Contact Information:

TG:

Telegram: Contact @s732387654

Twitter:

https://twitter.com/imxflowcom

Email:

imxflowcom@gmail.com

SECTION 2: GRANT INFORMATION

Detail the requested grant size, provide an overview of the budget breakdown, specify the funding and contract addresses, and describe any matching funds if relevant.

Requested Grant Size:

10k ARB

Grant Breakdown:

Development, hosting, maintenance

Funding Address:

To be provided

Funding Address Characteristics: MPC wallet

Distribution Contract Address:

n/a

Incentivised Contract Addresses:

n/a

SECTION 3: GRANT OBJECTIVES AND EXECUTION

Clearly outline the primary objectives of the project and the Key Performance Indicators (KPIs) used to measure success. This helps reviewers understand what the project aims to achieve and how progress will be assessed.

Objectives:

Simple and easy to understand analytics is what many people need to start trading on decentralized protocols. Crypto derivatives trading still looks too complicated for the masses. Researching and following profitable traders will encourage people to start using the protocol

I developed this tool for myself, and seeing how useful it is I decided to share it with the community

Key Performance Indicators (KPIs):

This tool analyzes data of traders' closed positions and provides flexible filters by traders' WIN RATE, PNL and count of trades

The tool aggregates open positions from GMX and MUX for a selected category of traders and displays them in real time. You can see the sentiment of top traders at any time, their position sizes, average leverage, their total PNL and PNL of open positions, which can be very useful for making a decision

You can also limit the age of open positions to see which positions were opened today or a few days ago

Add interesting traders to your favorites and follow them, even if they don't fit your chosen criteria. (Smart traders may not be profitable at the moment)

How will receiving a grant enable you to foster growth or innovation within the GMX ecosystem?:

More useful data and analytics available - more mass adoption

Justification for the size of the grant:

The requested grant will help cover the costs of development and maintenance, as well as adding new features if requested by the community

Grant Timeline:

The main features are already implemented and working, adding new features is possible upon request from the community. Since only GMX V1 is currently integrated, integration of V2 is required.

- V2 positions integration will take 2-3 weeks (Once the V2 integration is implemented this will be the milestone of receiving the 10k ARB grant amount)

Fund Streaming:

[Do you accept the funding of your grant streamed linearly for the duration of your grant proposal, and that the multisig holds the power to halt your streamed grant at their discretion at any time?]

Yes

SECTION 4: PROTOCOL DETAILS

Provide details about the protocol requirements relevant to the grant. This information ensures that the applicant is aligned with the technical specifications and commitments of the grant.

What date did you build on GMX?:

Oct/Nov 2023

Protocol Performance:

The tool has just appeared for public access

Protocol Roadmap:

More integrations are planned if requested and approved by the community

SECTION 5: Data and Reporting

Provide details on how your team is equipped to provide data and reporting on the grant distribution.

Is your team prepared to create Dune Spells and/or Dashboards for your incentive program?:

n/a

Does your team agree to provide bi-weekly program updates on the GMX Forum thread?:

Yes

Does your team acknowledge that failure to comply with any of the above requests can result in the halting of the program's funding stream?:

Yes

Please note: Labs and the Grants Committee retain the right to approve, disapprove, or subsequently disqualify any grant from the programs they are administering at their sole discretion.
