CIP:

title: Add new chains to DAO Snapshot Voting Strategies

author: [@yvesfracari](#)

status: Draft

created: <2025-01-07>

Simple Summary

To participate to the CoW DAO governance it is necessary to hold or a be a delegated to anyone who holds vCOW or COW on Mainnet or Gnosis chains. Since the protocol was recently deployed on Arbitrum and Base, the token was bridged to these chains as well. In that sense, we allow the holders on these chains to also participate on the governance.

Motivation

As possible to see on that [Dune Query](#), a small proportion of the tokens are holder on these chains, however, the holders should still have the same rights as the ones on the other chains.

Specification

Update the snapshot voting strategy to include the erc20-balance-of

strategy for holders of COW on Arbitrum and Base. The address of the token on each chain a
