The AIP is pretty complete but I just wanted to get some feedback to improve it before I submit.

THE ISSUE

Currently there is a massive divide at the DAO. Many community members feel their voice isn't heard, their apecoin doesn't count during voting and their time here is not appreciated. A lot of this unrest imo can be attributed to the many seeing that the few control the DAO. How can the communities collective voice be less than that of the MOCAVERSE voting power and recent voter HORIZENLABS? How can the results reflect the will of the apecoin community? How can a solution be found without diluting and disincentivising WHALES?

SOLUTION

Having looked at every voting option I can over the last year, considering hybrids of voting power + reputation + participation models etc etc, I have come to the conclusion that none would really be suitable for the DAO. Many options would penalise WHALES, other options would just strengthen WHALE votes even further and some options are easily manipulated/gamed.

Then around three weeks ago I saw a tweet from KODOMA.ETH. And although I may not agree with every word the overall thread was compelling - how do we fix the issue of outside entities controlling our VOTES - it then struck me - the answer isn't to dilute their votes, the answer is to provide a COUNTER and restore the BALANCE.

MOCAVERSE did this themselves recently when MACHIBIGBROTHER increased his voting power - yet they have not subsequently reduced the amount.

SO:

APECOIN FOUNDATION will delegate 6.3million APECOIN to a COMMUNITY WALLET to redress the balance and return the power to the people

QUALIFYING CRITERIA & IMPLEMENTATION

This will be a ZERO cost AIP. I will set out the tasks to be completed by FACILITATORS, GWG STEWARDS, THE SECRETARY & MYSELF overseeing.

The criteria for joining is set very low; is based on historical data (snapshot) taken 1st March 2024 and once compiled will not be added to. (One way I think - Trust level 2 as is extremely inclusive.)

This can be seen as not only restoring a VOICE & POWER back to the community (where it should have always been) but also as a REWARD for everyone that has brought us this far.

Please comment below anything you'd like me to add in, raise any concerns, ask any questions or simply just rant! Thanks
