Get Available Route Options

Request all available chains, bridges, exchanges, and tokens/coins. If you want to get an overview of which options (chains, bridges, DEXs, and tokens) are available at this moment, you can usegetTools ,getChains , andgetTokens :

```

Copy asyncfunctiongetTools( request?:ToolsRequest, options?:RequestOptions ):Promise

asyncfunctiongetChains():Promise

asyncfunctiongetTokens( request?:TokensRequest, options?:RequestOptions ):Promise

```

The request and response types can be found in our[types package](#) and are available inside the SDK.

For information on how the result of these endpoints looks like, have a look at the API documentation:

- getTools
- :[Requesting all supported Tools](#)
- getChains
- :[Requesting supported Chains](#)
- getTokens
- :[Requesting all known Tokens](#)
