# Pilot for a Questbook Jumpstart fund for problem definition and DAO improvement

Vote：In favor, excluding the playbook

Reason：I am in favor of the proposal, excluding the playbook. This initiative effectively addresses the DAO's need for structured problem definition and alignment, ensuring that proposals are well-prepared and strategically aligned. By focusing on early-stage initiatives and using Questbook's small grants model, we can improve the quality and impact of proposals within the Arbitrum DAO. While the playbook could be a valuable addition, the core elements of this proposal are sufficient to drive significant improvements in our governance and operational processes. This approach will help streamline our decision-making and foster greater engagement within the community.
