VPS/Bare-Metal Compliance

SGX Compliance for VPS options and the Secret Network

This is intended to guide you in selecting SGX-compliant VPS options for the Secret Network.

When renting a compliant bare metal machine from a VPS provider, ensure you do not accept any chassis or CPU substitutes they propose, unless those substitutes are on the[Hardware Compliance list](#) . All cost estimates are based on the following recommendations:

- Processor: E-series rather than E3 (due to age)
- SSD: 512GB+
- RAM: 64GB+
-

Just because a VPS is cheaper it does not make it better.
