Secret Network v1.6

The Secret Network v1.6 update did not introduce any breaking changes for developers. General performance improvements were introduced and described below;

- Changed internal WASM engine to Wasm3 from Wasmi. Contract performance increased greatly.
- Reduced gas costs:
  -
    - Default instruction cost 1 -> 2
  -
    - Div instruction cost 16 -> 2
  -
    - Mul instruction cost 4 -> 2
  -
    - Mem instruction cost 2 -> 2
  -
    - Contract Entry cost 100,000 -> 20,000
  -
    - Read from storage base cost 1,000 -> 10
  -
    - Write to storage base cost 2,000 -> 20
