Mobile/Gaming Wallets

We understand that you might need more than a Typescript/Javascript SDK. If you need an SDK written in Kotlin or Swift or a native game engine integration in Unity, Unreal, or GameMaker, please let us know and contact us via[Discord](#) or see the[Partnership](#) page.

Useful references to get started yourself

You might want to look closely at how we've structured the [Typescript/Javascript SDK](#) on GitHub.

Another helpful resource might be our[API reference](#) .
