As market momentum starts to pick up, we anticipate Uniswap governance being more active and important than ever before. In its current state, governance coordination is functioning, but not at peak performance. We believe that it would be advantageous to all stakeholders and the protocol to initiate a community call. Is there appetite for this?

Uniswap Community Calls would be a monthly meeting with the goals of discussing proposals and the general direction of the DAO. The meetings will hopefully be attended by delegates, proposers, various organizations, and contributors of all kinds. During the call, participants can discuss proposals, direction, potential protocol changes, and anything else pertinent to the community. We'd love to invite those with active proposals to discuss their undertaking with delegates and host an open Q&A.

Though we at Blockworks Research are more than happy to host and moderate the calls to start, we should in no way be considered a gatekeeper, and if others are interested in hosting a call or calls in the future please reach out. We think it is best that the calls be open to all.

A sample agenda may look something like the following:

- Discuss open proposals

- Updates from The Foundation

- Open discussion around DAO needs, direction, and potential RFPs

- Open Mic

We propose this call be held every second Tuesday of the month at 3PM UTC, starting in December. A Google meeting link can be posted on this thread every month, and corresponding minutes for the call will also be posted.
