Updates

Executives

- In November, we provided support to the following executives:

- Crafter role for [Nov 15th](#)

- Reviewer role for [Nov 29th](#)

- Crafter role for [Nov 15th](#)

- Reviewer role for [Nov 29th](#)

Protocol Engineering Scope - Governance Security Engineering Work:

- As the year ends, conversations with the Certora and Chain Security vendors have started to deliver 2023 feedback from all technical EAs which use their services and align on the 2024 scope.

- Due to the [Goerli testnet deprecation](#), discussions among several technical EAs have been going on to agree on a new way of working. These discussions are not finalized, but an initial agreement has been reached, and now we should start working in this new way to gather learnings and optimize.

- Since there are no regular executives in December, Dewiz has re-engaged in discussing a security improvement that we worked on a few months ago, which still requires alignment among technical EAs and Gov Facilitators. The proposal can be found [here](#).
