OrderLib

Functions

makerAssetData

function

makerAssetData (struct

OrderLib . Order order)

internal

returns

(bytes)

Parameters:

Name Type Description order struct OrderLib.Order

takerAssetData

function

takerAssetData (struct

OrderLib . Order order)

internal

returns

(bytes)

Parameters:

Name Type Description order struct OrderLib.Order

getMakingAmount

function

getMakingAmount (struct

OrderLib . Order order)

internal

returns

(bytes)

Parameters:

Name Type Description order struct OrderLib.Order

getTakingAmount

function

getTakingAmount (struct

OrderLib . Order order)

internal

returns

(bytes)

Parameters:

Name Type Description order struct OrderLib.Order

predicate

function

predicate (struct

OrderLib . Order order)

internal

returns

(bytes)

Parameters:

Name Type Description order struct OrderLib.Order

permit

function

permit (struct

OrderLib . Order order)

internal

returns

(bytes)

Parameters:

Name Type Description order struct OrderLib.Order

preInteraction

function

preInteraction (struct

OrderLib . Order order)

internal

returns

(bytes)

Parameters:

Name Type Description order struct OrderLib.Order

postInteraction

function

postInteraction (struct

OrderLib . Order order)

internal

returns

(bytes)

Parameters:

Name Type Description order struct OrderLib.Order

hash

function

hash (struct

OrderLib . Order order)

internal

returns

(bytes32 result)

Parameters:

Name Type Description order struct OrderLib.Order
