Migrate to Infura's IPFS service

The updated Infura IPFS service offers:

- A project dashboard
- with essential statistics.
- Pinning
- and unpinning
- API access.
- Publishing files in the background to the IPFS P2P network, so that content is globally accessible.

Use the ipfs-copy command-line tool to migrate your existing data if you're:

- An existing Infura IPFS user, using the older Infura IPFS service
- .
- Migrating from a self-hosted IPFS node
- .
