WalletConnect V2: Fixes & V1 Bridge

27th June 2023

With v0.17.14 ([released and available now](#)), we are also introducing a new prop calledwalletConnectV1Bridge .

This enables you to use a custom WalletConnect V1 "bridge", for example[Derelay](#) by[Rabby](#) . By doing so, you can stay on WalletConnect V1 for as long as your chosen bridge supports it.

If you do choose to use a bridge, it's important not to enable Walletconnect V2 in your Dynamic dashboard.

You can still change over to WalletConnect V2 any time by following[this guide](#) .

Here is an example implementation of the bridge mentioned above:

Here is a Codesandbox reference for the code as above:

https://codesandbox.io/s/dynamic-wallet-connect-v1-bridge-gsyr79?file=/src/App.tsx
